

June 2021

We, the Presidents of Together4Bristol / Churches Together in Greater Bristol, unite in recognising the climate emergency, and we call on all churches to take further steps to care for God's precious creation.

We recognise that the climate crisis is impacting our sisters and brothers around the world, and that the younger generation will bear the brunt of our changing climate. We stand in solidarity with them, and in determination that, together with our partners across the city, we can take strong action to decarbonise and build a brighter, greener future.

Yours in Christ
